आनो भद्राः क्रतवो यन्तु विश्वतः ॥
જે ગતિ નથી કરતો એ ક્યારેય પ્રગતિ નથી કરતો.

Title of Project:

ComfiGo-Online Bus Ticket Booking

Student's Full Name:

Ms. Swati J. Sarvaiya(23SI002UG02386)

Seat No. _____

Under The Guidance of:

Mr. Mayank Pandya

Submitted to:

Saurashtra University

In partial fulfillment of the requirements for the degree:

Bachelor of Computer Application (B.C.A.)

Year of Submission:

(2025-2026)

**Smt. K.S.N. Kansagara Mahila College,
Opp. Nobel house,
Kalawad Road, Rajkot.**

आनो भद्राः क्रतवो यन्तु विश्वतः ॥

Accredited Grade 'B' By NAAC | Accredited Grade 'A' By G – AAA

KalawadRoad, Rajkot – 360 007. Phone: O. 0281 – 2452640 R. 0281 - 2589088

Certificate

Project Id: BCA25@35

Date: _____

This is to certify that **Ms. Swati J. Sarvaiya** with Enrolment No.23SI002UG02386 is a final year student of the **Bachelor of Computer Application (B.C.A.), Saurashtra University**, and is required to do a six months B.C.A. project work in her Fifth semester. I ensure you a sincere and quality output from her. The experience gained by this project Work, not only benefit the student to partially fulfill the requirements of the B.C.A. of **Saurashtra University**, but also lay a foundation for her future career.

Signature (Project Guide)

Signature (Principal)

ACKNOWLEDGEMENT

It is indeed a great pleasure to express our thanks and gratitude to all those who helped us. No serious and lasting achievement or success one can ever achieve without the help of friendly guidance and co-operation of so many people involved in the work.

We are very thankful to our faculty guide **Mr. Mayank Pandya** who makes us follow the right steps during project work. We express our deep sense of gratitude to his guidance, suggestions and expertise at every stage. Apart from that his valuable and expertise suggestion during documentation of our report indeed helped us a lot.

We would like to thank our college's faculty members who have been always guided us towards the path of success, They help us through the entire project duration and also have been the source of encouragement. Finally, we sincere thanks to our classmates for provide innumerable discussions on many procedures and tips.

We are also thankful to the Smt. K.S.N. Kansagara Mahila College that they gave such a big opportunity. We would also like to thank our principal sir and all the faculties of our college for giving us guidance so that we can go through the project without any problem. This project helped us to get idea of the real system and there development procedure

PROJECT PROFILE

Project Name	ComfiGo- Online Bus Ticket Booking
Platform	Windows 11
Front End	HTML, CSS, JavaScript
Back End	MySQL, PHP
Documentation Tool	Microsoft Word
Web Server	Apache(XAMPP)
Web Browser	Google Chrome
Editor	VSCode
Project Id	BCA25@35
Guided By	MR. Mayank Pandya
Submitted To	Smt. K.S.N. Kansagara Mahila College, Rajkot
Project Duration	3 Months

PROJECT DEFINITION

➤ Reason for chose this definition:

- I choose this definition because instead of standing in long queues at the counter, people can book their bus tickets online.
- The Online bus ticket booking system aims to solve real-life problems like the inconvenience of manual booking.
- In an Online bus ticket booking, bookings are very easy and fast.

➤ Purpose:

- It helps to book tickets easily and instance.
- People can sit at home and book their tickets without going to the bus stations.
- Easy to search buses, Book tickets and choose their seats at their time convenient.

➤ General Introduction:

- The ComfiGo online bus ticket booking project is a digital platform designed to search buses, book online tickets, select seats according to your convenient.
- Passenger can book tickets from anywhere and anytime using the system. They don't need to visit the bus station physically, which saves efforts and time.
- Users can instantly check which buses are available on a route, what timings they follow and which seats are vacant before booking.
- Instead of standing in long queues at ticket counters, users can complete the entire process online within minutes.
- All bookings, Passengers details and bus schedules are stored in structured database. This makes it easy to track past records, generate reports and improve services.

➤ **Benefits of online ticket booking:**

- Passengers can book their tickets from the comfort of their home or office without visiting the bus station. This saves time.
- The system can be accessed anytime and from anywhere, which is especially helpful for people with busy schedules or those living far from bus stations.
- Passengers can view which seats are available and can select their preferred ones.
- Users can see clear details about ticket availability, bus routes and timings, which increases trust in the system.

ANALYSIS

➤ **There are three kind of analysis in this project:**

1. Admin side
2. User side

1. Admin side Analysis:

- Only admin can handle this site

➤ **Login:**

- Only admin can login in this page

➤ **Admin Dashboard:**

- Admin can login into admin dashboard and can view the users.

➤ **Buses & Routes Managements:**

- Admin can view all the buses, routes and can manage all of these like add bus , edit or delete routes etc.

➤ **User Management:**

- Admin can view all the users and handles them, if they want to delete them.

2. User side Analysis:

- In our project we put some menu like Home, About Us, Contact Us, Registration, login etc.

➤ User Registration & Login:

- The registration process includes user's details like name, email, phone number, password, etc.

➤ Search Buses:

- Users can search buses from where to where buses are available.
- Searching buses and then can check available routes for the destinations.

➤ Seat Selection and Payments:

- Users can choose the bus according to their convenience from available routes and can select seats for them.
- After seat selection, there are options for payments like, UPI and Cash on arrival.

➤ Bookings & Contact:

- Users can see all the bookings of them, what they done and contact to owner as per their interest.

FEASIBILITY STUDY

- Feasibility when starting of a project you would need to look at if it is possible to create this project.
- To objective of this system is to determine quickly and at a minimum expense to establish how to solve a problem.

1. Technical feasibility:

Hardware Requirement	
RAM	Minimum 1 GB
Hard Disk	250 GB
Processor	I5

Software Requirement	
Operating System	Windows 11
Front End	HTML, CSS, JAVASCRIPT, BootStrap
Back End	PHP, MY SQL
Web Server	Apache(XAMPP)
Web Browser	Google Chrome, Internet Explorer, Mozilla Firefox

2. Operational Feasibility:

- In this project, The management will know the details of each project.
- Operational feasibility measure the urgency of the problem and its solution.
- The project of ComfiGo works properly if it is being developed and implemented.

3. Economical feasibility:

- Economic feasibility is analysis of cost of the system carried out in project.
- The template used in the project is completely free.
- The hardware and software used in project are also free of cost.
- Hence the whole project is economically feasible.

4. Time Feasibility:

- Time feasibility consist how much time you take to complete your project.
- A project will fail if it takes too long to be completed before it is useful.
- My project will complete in around 3 months.
- Hence it is timely feasible.

E-R DIAGRAM

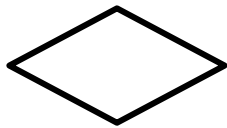

- Entity Relationship Diagram helps to explain the logical structure of database.
- E-R Diagram uses some basic symbols.

➤ **RECTANGLE**

A rectangle to denote an entity set.

➤ **DIMOND**

A Dimond to denote a relationship between two entity.

➤ **OVAL**

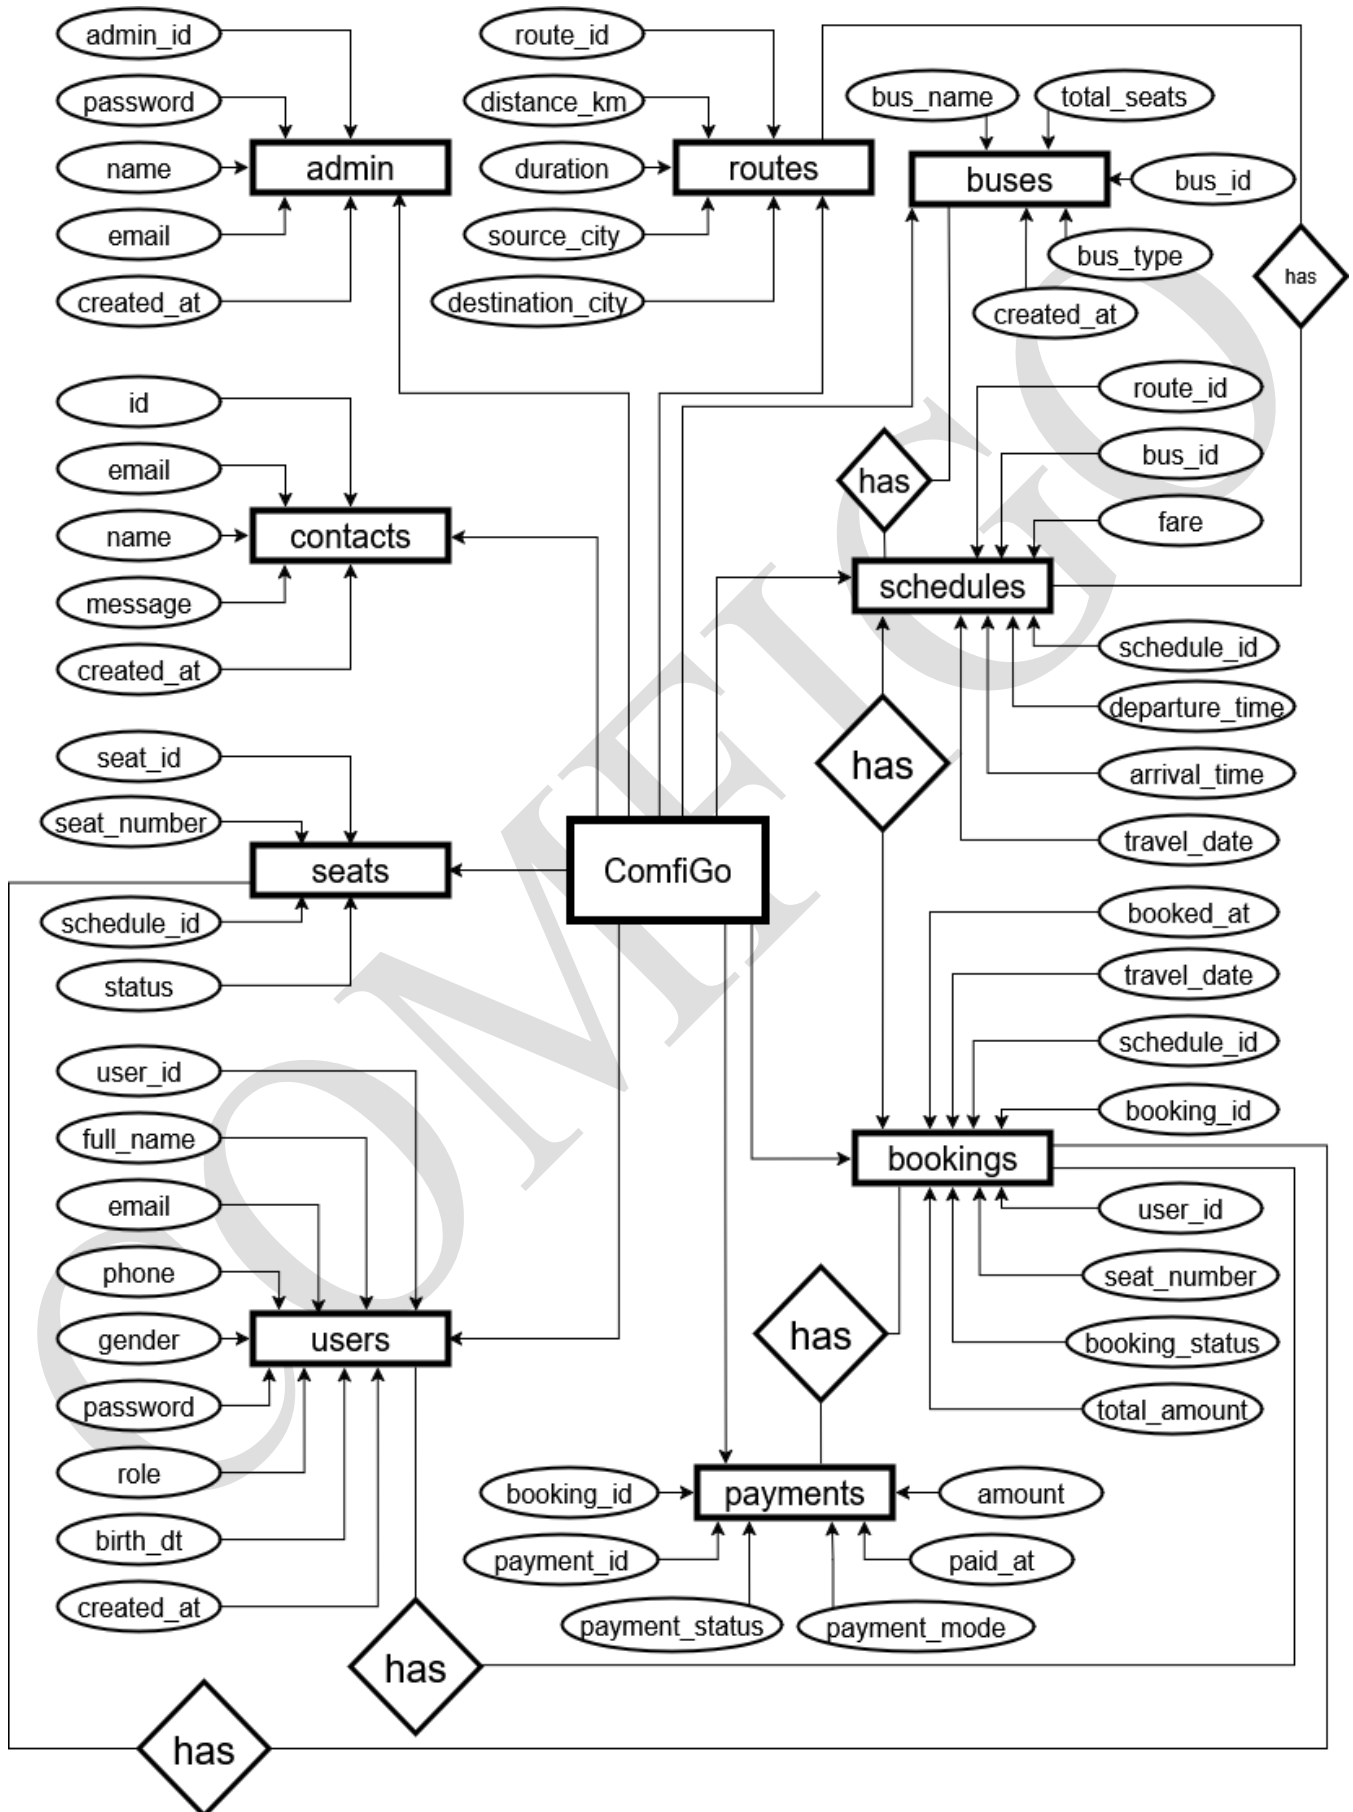

An oval to denote attribute.

➤ **LINE**

A line which links attributes an entity set and entity sets to relationship.

Entity Relationship Diagram

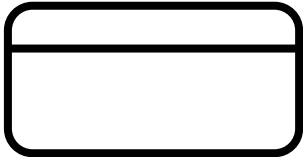

DATA FLOW DIAGRAM

- A data flow diagram is a graphical representation of the flow of data through a system.

- It represents external entities with which systems communicate

- A process is represented as a rectangle with rounded corners

- Data store used to model a collection of data packets at rest

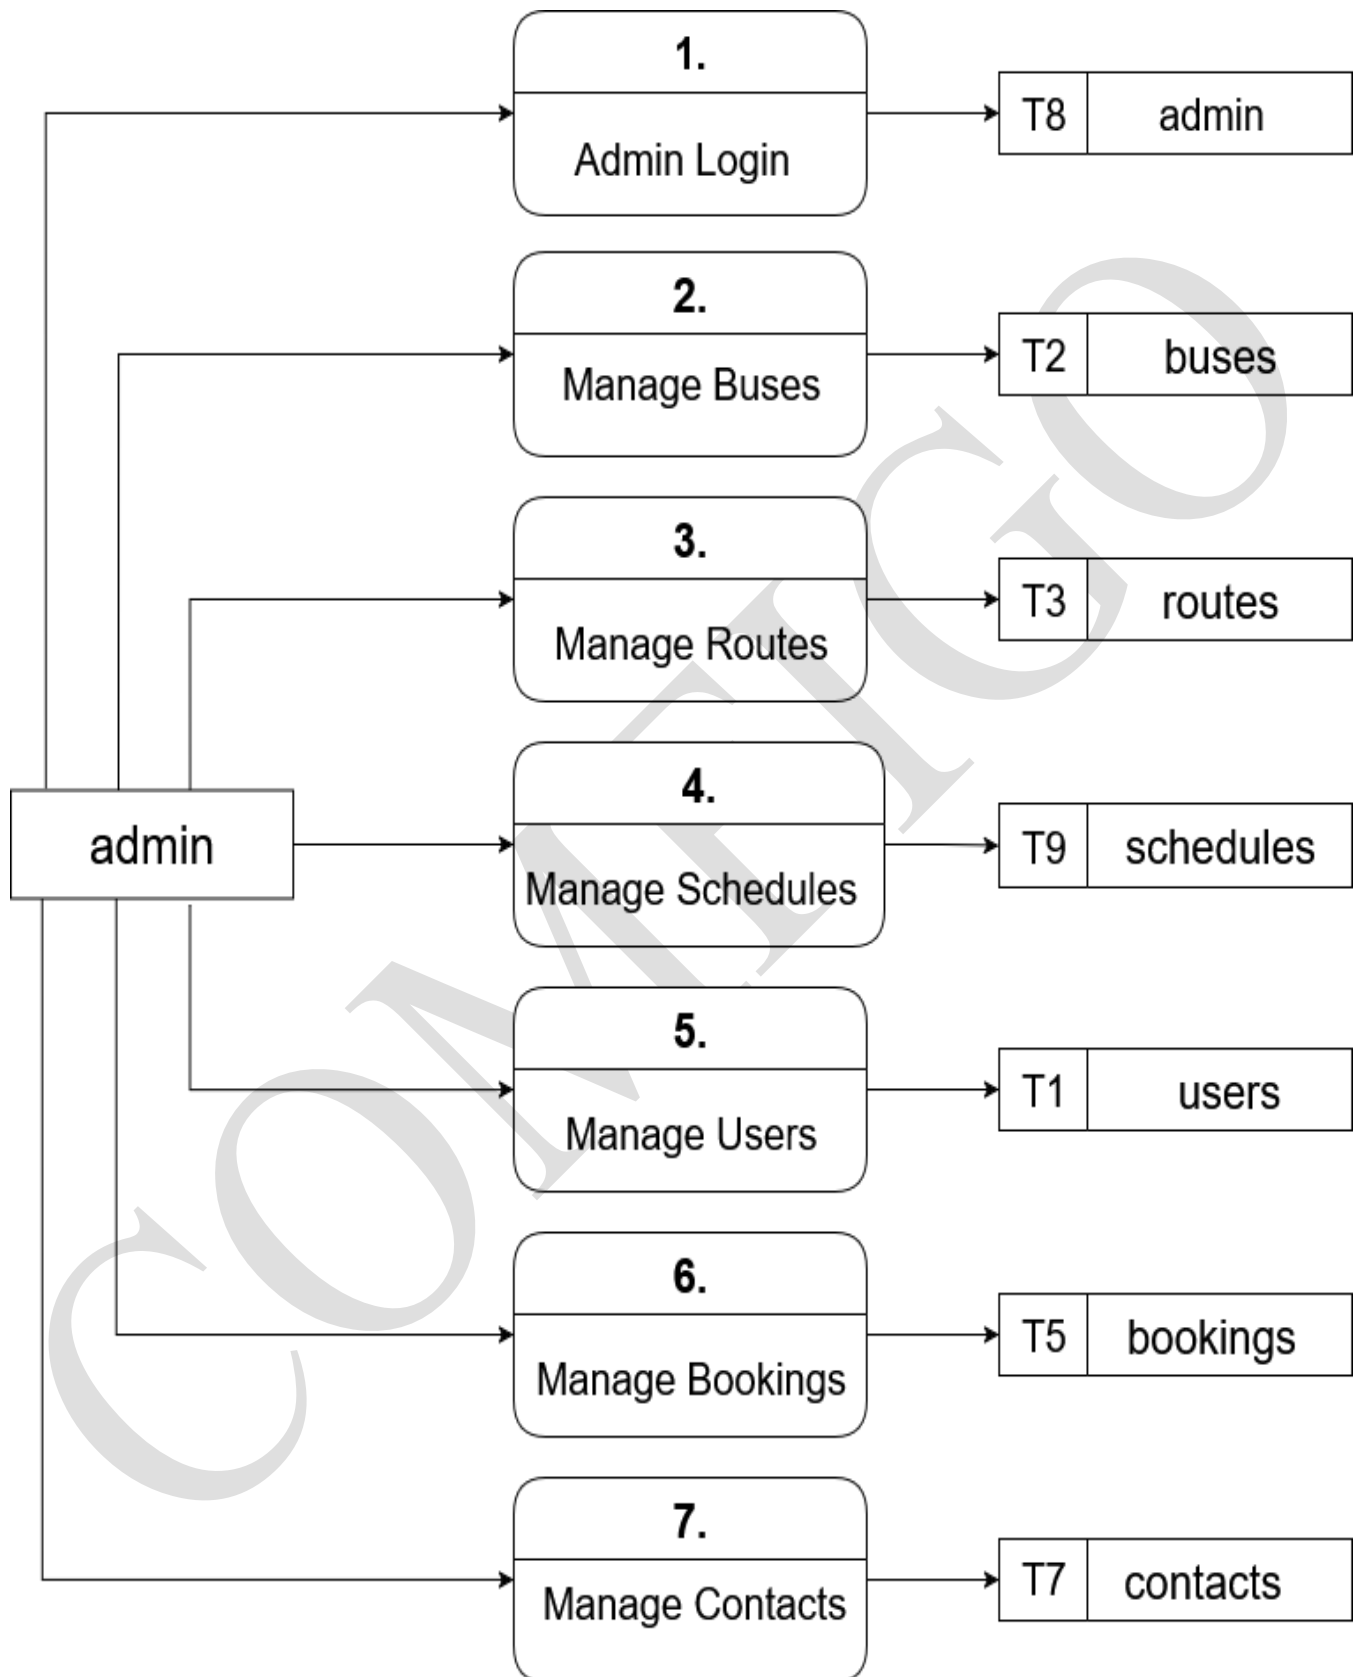

- Represents flow of data

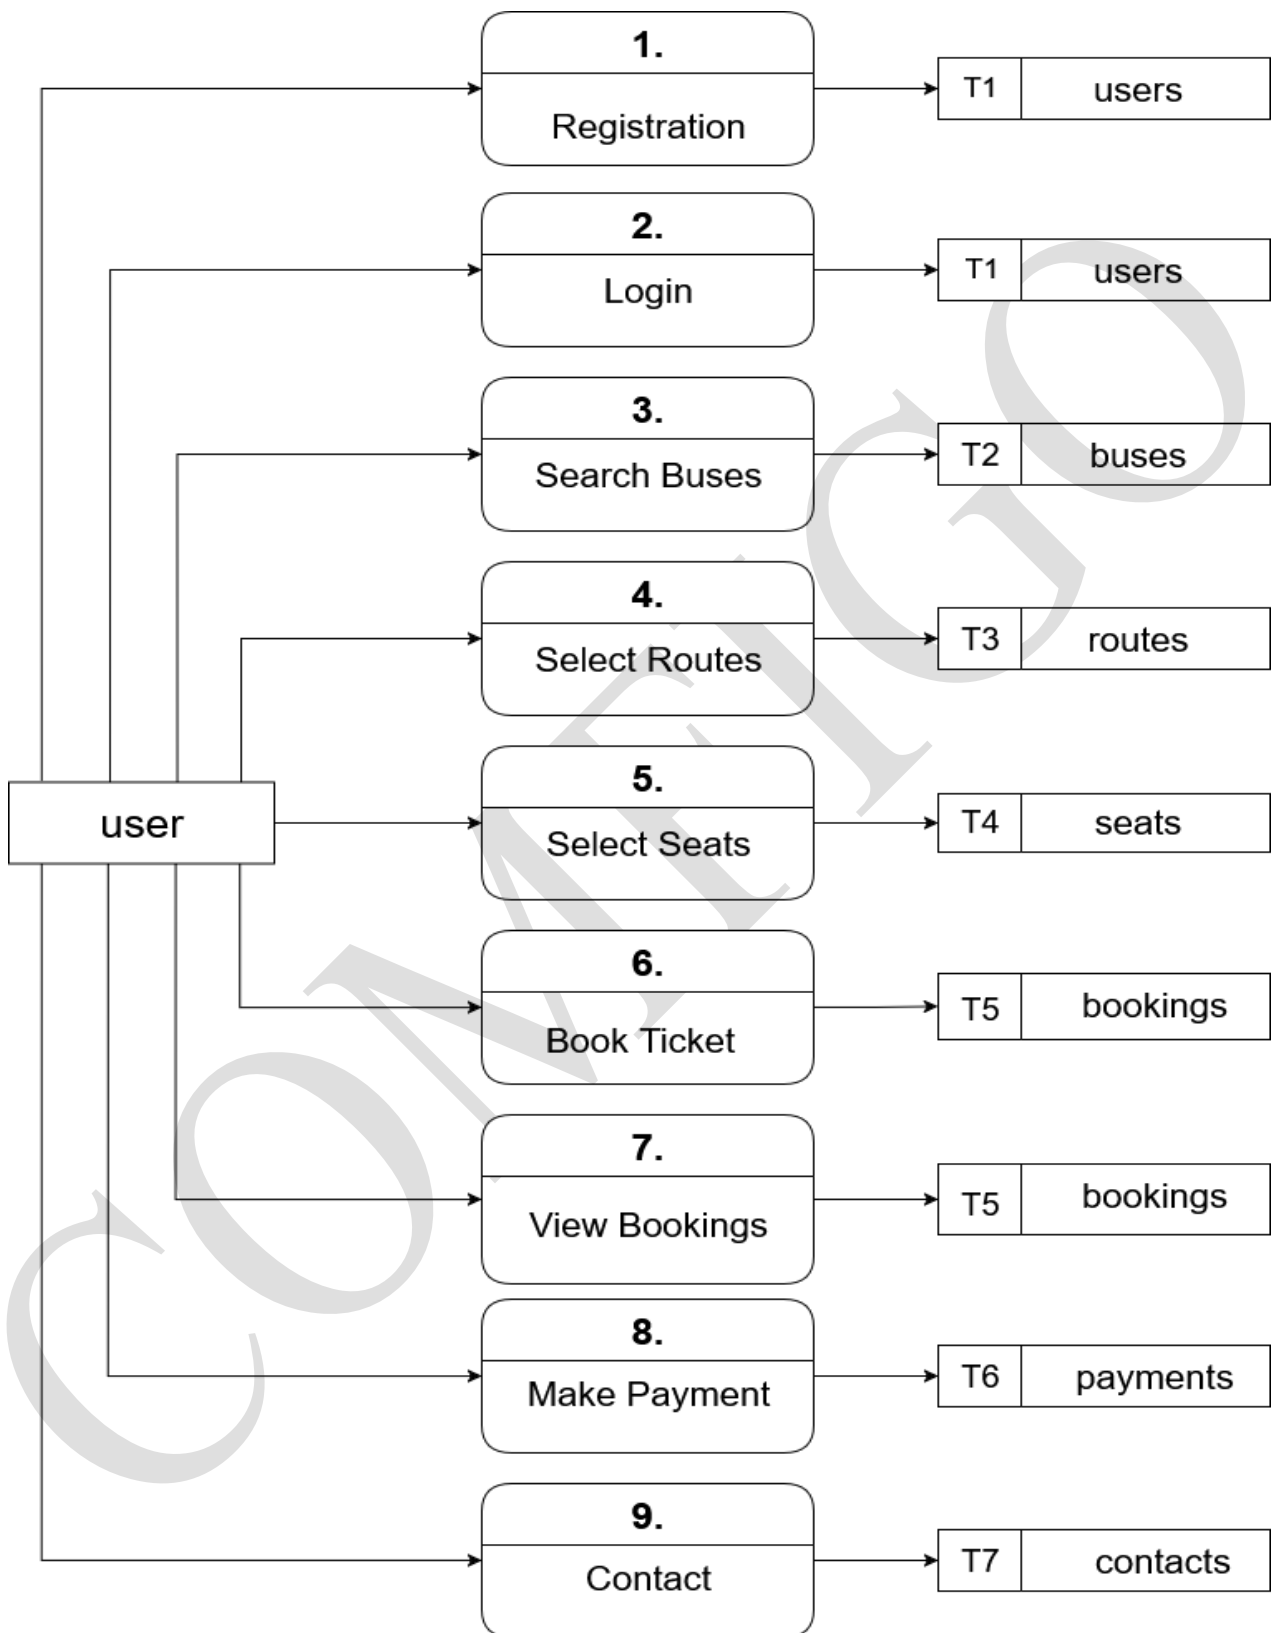

LEVEL-0 DFD DIAGRAM

LEVEL-1 DFD: ADMIN SIDE

LEVEL-1 DFD: FOR USER SIDE

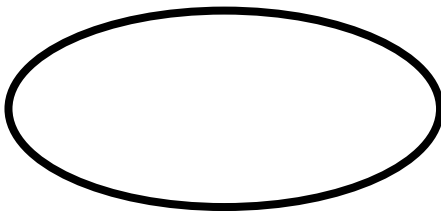

USE CASE DIAGRAM

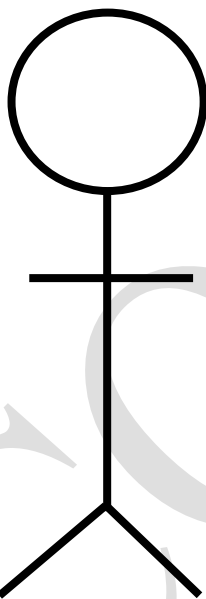

- Use case diagram gives a graphical overview of the actors involved in a system, different functions needed by those actors & how these different functions interact.

- Used to draw your system's boundaries.

- It represents system's functions.

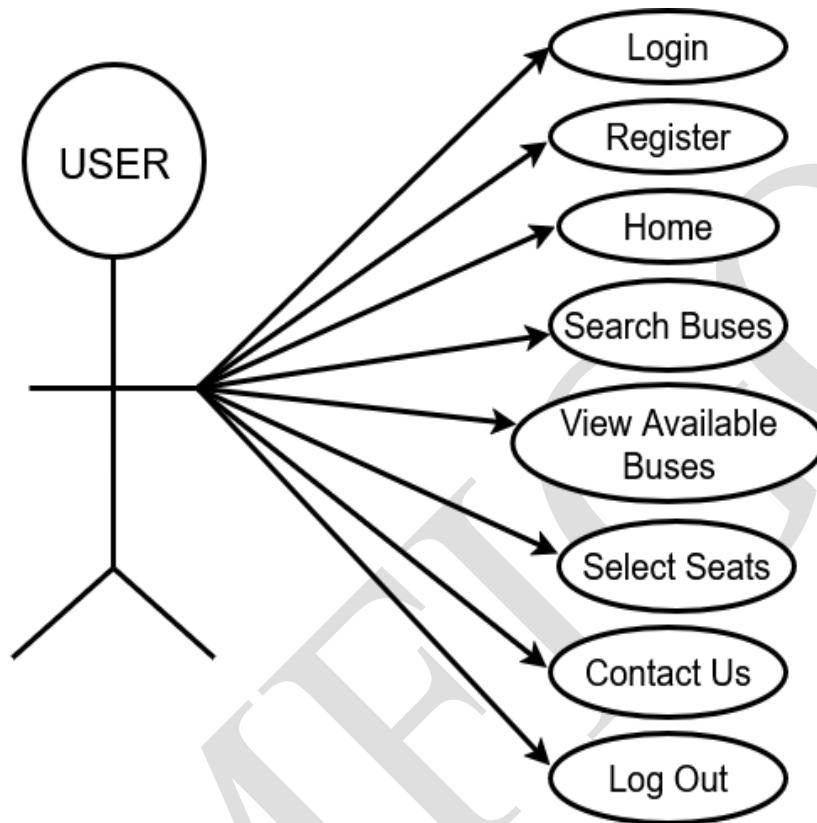

- It represents user of diagram

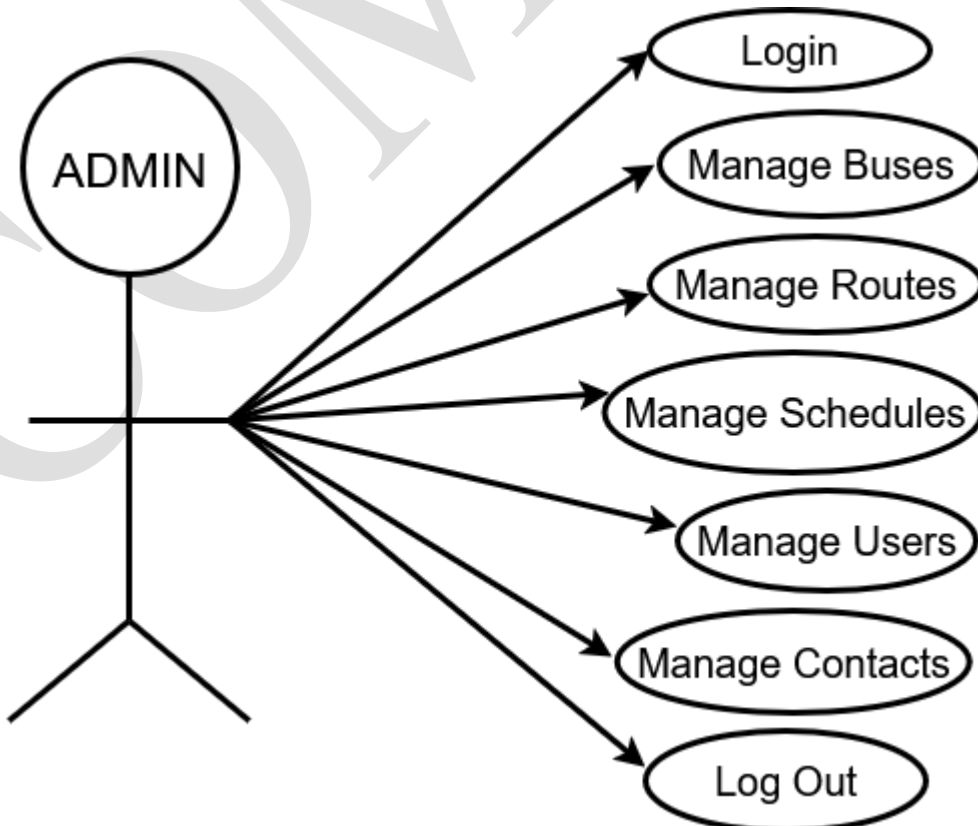

- It represents relationship

☐	3	email	varchar(150) utf8mb4_general_ci		No	None			 Change  Drop  More
☐	4	message	text utf8mb4_general_ci		No	None			 Change  Drop  More
☐	5	created_at	timestamp		No	current_timestamp()			 Change  Drop  More

DESCRIPTION:- All the details of contacts are stored in this table.

SCREEN LAYOUT

USER SIDE :

1. HOME PAGE :-

The screenshot displays the ComfiGO website's home page. At the top, a navigation bar includes the 'ComfiGO' logo and links for 'Home', 'Search', 'About Us', 'Contact Us', 'Login', and 'Signup'. The main header features the title 'Book Your Bus Ticket Easily' and the tagline 'Fast, Secure & Comfortable Travel – Anytime, Anywhere' with a bus icon. Below this is a search form with fields for 'From' (source city), 'To' (destination city), and 'Travel Date' (dd/mm/yyyy), accompanied by a search button. The 'Why Choose ComfiGo?' section highlights three benefits: 'Luxury Buses' (clean, modern buses), 'Affordable Prices' (best fares, no hidden charges), and 'Secure Payments' (100% secure system). The 'Popular Routes' section lists four routes with starting fares and 'Book Now' buttons: Rajkot to Ahmedabad (₹800), Ahmedabad to Rajkot (₹500), Rajkot to Gandhinagar (₹1200), and Rajkot to Mumbai (₹300). The footer contains copyright information, contact email, and phone number.

DESCRIPTION:- Users can see all available buses.

5. PAYMENT:-

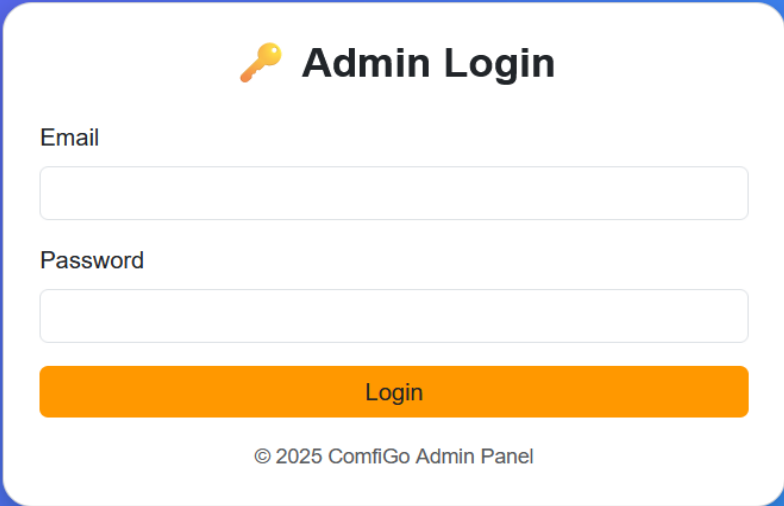

The screenshot displays a web application interface for 'ComfiGO'. At the top, there is a header bar with the 'ComfiGO' logo on the left and a hamburger menu icon on the right. Below the header, a large purple-to-blue gradient banner contains a white rounded rectangle. Inside this rectangle, the text 'Choose Payment Method' is centered at the top. Below this text, there are two radio button options: 'UPI' and 'Cash on Arrival'. At the bottom left of the white rectangle is a blue button with the text 'Pay Now'.

DESCRIPTION:- User purchase the product or service.

ADMIN SIDE :

1. ADMIN LOGIN:-

The image shows a screenshot of an 'Admin Login' form. The form is centered on a blue gradient background. It has a white rounded rectangle container. At the top of the container is a yellow key icon followed by the text 'Admin Login'. Below this are two input fields: 'Email' and 'Password'. The 'Email' field is a simple white box. The 'Password' field is a white box with a small eye icon on the right side. Below the password field is an orange 'Login' button. At the bottom of the container, there is a small copyright notice: '© 2025 ComfiGo Admin Panel'.

DESCRIPTION:- Admin can login first in this page.

2. ADMIN PANEL:-

DESCRIPTION:- After admin login first this page will appear.

3. MANAGE BUSES:-

The Manage Buses page includes the following elements:

- Header:** Welcome, Super Admin (with a Logout button).
- Section Title:** Manage Buses.
- Add New Bus Form:**

COMFIGO ONLINE BUS TICKET BOOKING WEBSITE TESTING

REPORT

COMFIGO is a student project website for online bus ticket booking. This testing report evaluates the website's **functionality, usability, performance, and security**. Testing ensures a smooth and secure user experience.

Purpose of Testing:

- Verify proper functioning of all website features
- Detect and report bugs
- Assess usability and performance
- Ensure security and data integrity

➤ Testing Types:

2.1 White Box Testing

White box testing involves checking the internal code, database, and logic. Testers have full access to the source code to verify data flow and efficiency.

Key Points:

- Full access to code, database, and logic
- Ensures internal code efficiency
- Includes: Unit Testing, Statement Coverage, Path Coverage

2.2 Grey Box Testing

Grey box testing is a combination of white box and black box testing. Testers have **partial knowledge** of the internal structure and test mainly through the user interface.

Key Points:

- Partial internal knowledge
- Focuses on functionality and data flow
- Useful for integration and security testing

TEST CASES:

A) User Registration & Login

TC ID	Test Scenario	Steps	Expected Result	Future Feature
TC01	Valid Registration	Enter all required details & submit	Account created successfully	Social login via Google (future)
TC02	Invalid Username	Leave username blank/invalid format	Show validation error	-
TC03	Valid Login	Enter correct username & password	Redirect to homepage/dashboard	-
TC04	Wrong Password	Enter incorrect password	Error message displayed	Forgot password option (future)

B) Bus Search & Selection

TC ID	Test Scenario	Steps	Expected Result	Future Feature
TC05	Search Bus	Enter source, destination, date	Show available buses	Filter timing and fare wise
TC06	Invalid Search	Enter same source & destination	Show error message	-
TC07	View Bus Details	Click on bus	Show timing, type, seats, fare	-
TC08	Select Seats	Choose available seats	Seats highlighted as selected	-
TC19	Blocked Seats	Try selecting already booked seat	Seat not selectable	-

C) Booking & Payment

TC ID	Test Scenario	Steps	Expected Result	Future Feature
TC10	Confirm Booking	Select seats & proceed	Booking confirmation page shown	Online Digital Ticket
TC11	Successful Payment	Pay using valid UPI	Ticket booked, confirmation shown	Net banking, cards
TC12	Failed Payment	Enter wrong UPI id	Show payment failed	-

D) Admin Management

TC ID	Test Scenario	Steps	Expected Result	Future Feature
TC13	Manage Buses	Add/Edit/Delete bus	Data updated in DB	-
TC14	Manage Routes	Add/Edit/Delete route	Data updated in DB	-
TC15	Manage Users	View user list	User details displayed	-
TC16	Manage Bookings	View booking list	Correct records shown	-
TC17	Manage Contacts	View contact form queries	Messages displayed properly	-

E) Security Test Cases

TC ID	Test Scenario	Steps	Expected Result	Future Feature
TC28	SQL Injection	Try ' OR 1=1 - - in login	Access denied	-
TC19	Session Timeout	Stay idle for 15 mins	Auto logout	-
TC20	Password Encryption	Register/Login	Password stored in hashed form	-

➤ Notes for Localhost Testing

- Ensure XAMPP Apache and MySQL are running.
- All URLs are localhost-based (e.g., <http://localhost/comfigo>).
- Focus testing on forms, login, cart, and navigation.
- Advanced security & performance testing can be added after future enhancements.

GANTCHART

No.	Gantt chart	June		July			August		September		October
		25/6	30/6	1/7	12/7	20/7	3/8	15/8	1/9	10/9	2/10
1.	Requirement Gathering										
2.	Analysis										
3.	Designing										
4.	Coding										
5.	Testing										
6.	Implementation										
7.	Report										

LIMITATIONS

- Live tracking of buses not available.
- No mobile app version right now.
- Limited security features (no OTP login).
- Ticket cancellation and refund not automated.
- Works only with internet connection.
- Seat layout is fixed for all buses.
- Only admin can manage data.
- No feedback or complaint system for users.

FUTURE SCOPE

- Add many other payment option for easy booking.
- Show live bus tracking using GPS.
- Send booking confirmation through email or SMS.
- Create a mobile app for Android and iPhone.
- Add QR code tickets for quick scanning.
- Add offers, discounts, and reward points.
- Allow users to give reviews and ratings.

WORK EXPERIENCE

Our project guide Mr. Mayank Pandya provided full support to us. He always helped us just like a companion and not just as professional guide; he also provide the information required by us at any time. He personally worked hard for our project. Also the other faculty members related to the computer department never refused to help us. Also the institute has provided the immense help by leap and bounds.

We also learnt some designing techniques; so, we heartily thankful to all who helped us in gradually climbing the steps towards the completion of this project of ComfiGo-Online Bus Ticket Booking system. Thank you all faculty members giving us such a great opportunity.

Last but not the least the overall experience of developing this project is as good as studying an entire new subject to fueling up the knowledge treasure.
